An Integrated Gateway to Employment Support and SSDI

Employment/Eligibility Service (EES)

An aggressive approach to EES system development

- **Establish multi-agency federal office**
 - Grants for pilot systems targeted at workers most likely to benefit from employment supports
 - Develop infrastructure to support EES
 - Criteria for scaling up
- **Modernize the definition of disability**
- **Require use of current eligibility criteria and processes while the new system is developed**
- **Policymakers actively monitor progress and weigh in when needed**
